Waste4Change

PROGRAMME | Waste Management & Recycling
Environmental Awareness & Skills Development

At Waste4Change, we are dedicated to empowering members of under-resourced communities who are passionate about waste management. We foster an environment where individuals can discover and implement their own solutions, becoming catalysts for change in their communities and the environment.

We find opportunities where others see none.

Description & Outcomes: The Waste4Change Programme provides a comprehensive curriculum that covers essential skills such as leadership, communication, problem-solving, and innovation. Through interactive methods, participants gain proficiency in these areas while developing a holistic understanding of the sustainable economic impact, particularly in the waste management sector in rural South Africa.

Starting with a 5-Day Bootcamp that introduces entrepreneurial concepts to ignite innovation, we enable participants to start or grow successful and sustainable businesses.

Programme Activities: Participants engage in a variety of activities, including: Environmental and waste awareness workshops, a blend of theoretical and practical training sessions and monthly group mentoring sessions.

- **Accreditation:** This 12-month skills training programme and the accompanying course materials are accredited by TETA and endorsed by QCTO.
- **Qualification:** Upon successful completion of all SETA requirements, participants will earn a National Certificate in Environmental Practice (49605-Level 2) with 128 credits on (NQF) Level 2.
- **Objectives:** The Waste Management and Recycling Programme equips participants with new opportunities, tools, and skills while fostering a positive environmental impact.

By participating in this programme, individuals contribute to the creation of products and services derived from waste materials, aligning with our business training initiatives focused on sustainable entrepreneurship.

This accredited training programme offers a comprehensive curriculum designed to empower participants with practical skills, knowledge, and insights essential for effective waste management, recycling, and sustainable business practices. Join us on this journey of empowerment and environmental stewardship, making a lasting impact on our world.

Environmental Consciousness Meets Transformative Action!
